HuEvo
Human Evolution

Turnkey robotics Easy to integrate Ready to perform

HuEvo operates in advanced industrial automation, specializing in collaborative robotics designed for dynamic, high-flexibility production environments.

We deliver **complete turnkey systems** that are **ready to use** and **easy to integrate** into existing processes—positioning ourselves as a **true partner**, not just a supplier of technologies.

Created to address the growing demand for **smarter** and **more flexible automation**, HuEvo combines **robotics** and **artificial intelligence** to help companies **stay competitive** in fast-evolving industrial scenarios.

Our solutions are engineered for **high-mix, variable production**, seamlessly integrating **robotics, machinery, and software** into **flexible, scalable systems**, supported by **24/7/365 assistance**.

Backed by **proven expertise**, HuEvo ensures **reliability, quality**, and full **compliance with international standards**—combining **innovation, modular design**, and **fast, responsive global support**.

All systems are designed to **operate safely alongside human operators**, enabling true **human-robot collaboration** within shared workspaces.

Humanoid

A **multifunctional, self-learning servant**, capable of adapting to a wide range of industrial tasks. Engineered for collaboration with humans and automated machines.

Intelligent, evolving, and highly versatile, this upcoming solution represents a new step toward more adaptive and future-ready production systems.

Logistic Fleet

Autonomous logistics ecosystems, featuring fleets of **AI-driven shuttles and autonomous forklifts** designed to optimize internal material handling across complex industrial environments. **Integrated into existing workflows**, enabling real-time coordination, intelligent routing, and adaptive task management based on production needs.

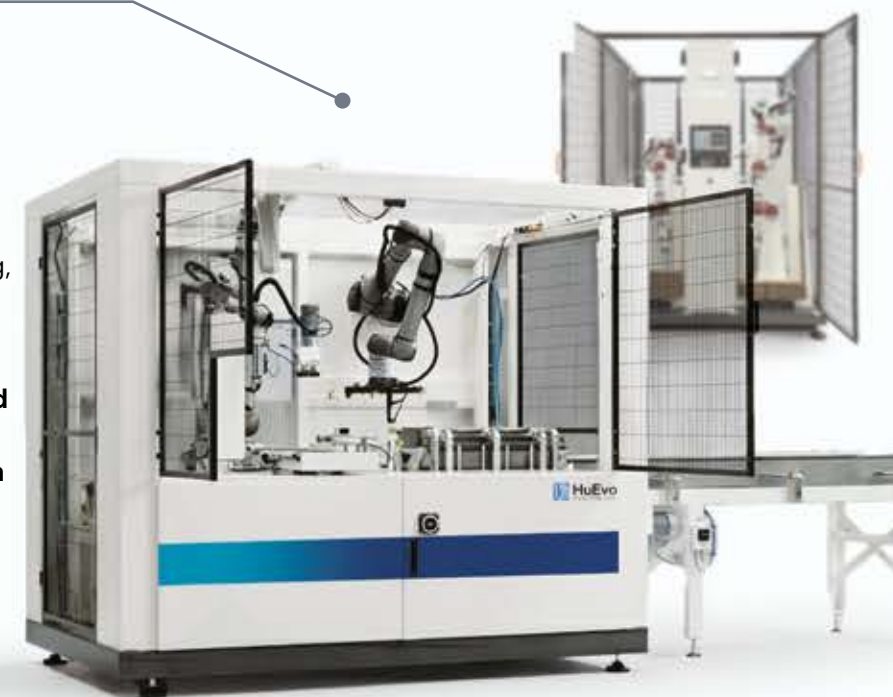

By leveraging artificial intelligence, HuEvo logistic Fleet ensures continuous optimization of movement, reducing idle time, minimizing errors, and improving overall operational efficiency.

Casepacker

We deliver **end-of-line casepacking solutions** designed to handle a **wide range of products**, ensuring **maximum efficiency** and **seamless integration** into existing packaging lines.

- **Reduced labor costs** through advanced automation
- **Collaborative robot arms** performing erecting, forming, taping, and filling within a **single, integrated solution**
- **Turnkey casepacking system**, compliant with **international standards**, designed for **fast and reliable deployment**
- **Maximum flexibility**, enabling **easy relocation** between production lines
- **Full compatibility** with all leading robot brands

Palletizers

We provide **advanced palletizing systems** for end-of-line operations, built for **high-efficiency environments** and smooth integration into complex production and logistics flows.

- Ready for **fast deployment** with high flexibility in **handling a wide range of products**
- Compatible with **all leading cobot arms** and configurable end-of-arm tooling
- **Modular design** enabling **easy relocation** between different production lines
- **Seamless integration** into existing production lines and logistics flows
- **Smart automation** with **integrated vision and tracking systems**
- Support for **mixed palletizing** of **different box types simultaneously**
- **User-friendly operation** enabling quick setup and easy management

Harvester

We develop automated harvesting solutions for food processing, enabling **precise handling of variable products** while improving yield, reducing waste, and ensuring **consistent output**, thanks to **integrated 3D vision with artificial intelligence**.

- Ready-to-use **modular system**
- **High-quality robotic components**
- Certified and **reliable setup**
- **Flexible and customizable configuration**
